materials that make a difference

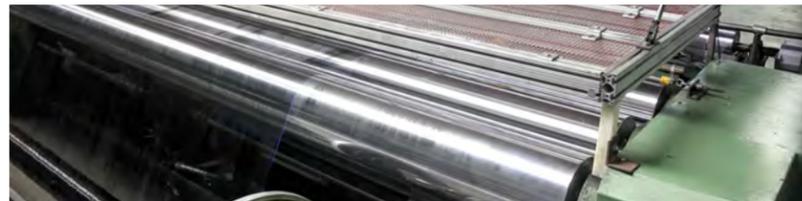

Materials That Make a Difference

TenCate is a multinational corporation focusing on a combination of textile technology and chemical processes. The company develops and produces specialized materials with specific properties.

Our solutions come from broad and deep roots in technology. The TenCate mindset comes from entrepreneurship, creativity, innovation and the international industries we serve. Our products are designed for quality and value creation.

An important role is played by TenCate Industrial Fabrics. The main activities of this division are development and production of technical textiles. We focus on highly specialized fabrics for specific problem solving.

TenCate Industrial Fabrics runs a comprehensive and versatile range of woven, non woven and knitted high grade polypropylene and polyethylene products under the TenCate Nicolon® brand portfolio. These have a proven track record in many commercial and industrial markets worldwide. TenCate's Industrial Fabrics are produce in state of the art facilities in the United States, Europe and Asia.

Horticultural and Agricultural Fabrics

Shade Cloth Fabrics

Our shade fabric, Nicolon® Shade Cloth, is used in commercial nurseries and greenhouses for shading horticultural plants. These products are manufactured in widths ranging from 6'-20', and in shading levels from 30% to 95%. Highly versatile Nicolon® Shade Cloth is also used for shading agricultural crops, livestock, and as industrial debris nets.

Ground Cover Fabric

Used by professional growers and landscapers for weed control, ground cover is also used for frost protection, barrier fencing, and to prevent the roots of potted plants from implanting into the soil.

Recreational Fabrics

Swimming Pools

Covers

Our mesh fabric is used to make safety swimming pool covers. Pool cover fabric is available in a great variety of constructions, widths, and colors. This fabric may also be used in cattle duster bags, irrigation filters, truck covers, and many other applications.

Skimmers

We also offer lightweight mesh fabric in blue or black for use in pool skimmers.

Tennis Courts

Windscreens

We manufacture tennis windscreen fabrics in four distinct styles in six and nine foot widths. These woven and knitted fabrics are available in a range of densities to meet a variety of windbreak and privacy requirements. These fabrics are also often used for privacy screening, crowd control fencing, and visual barriers.

Trampoline

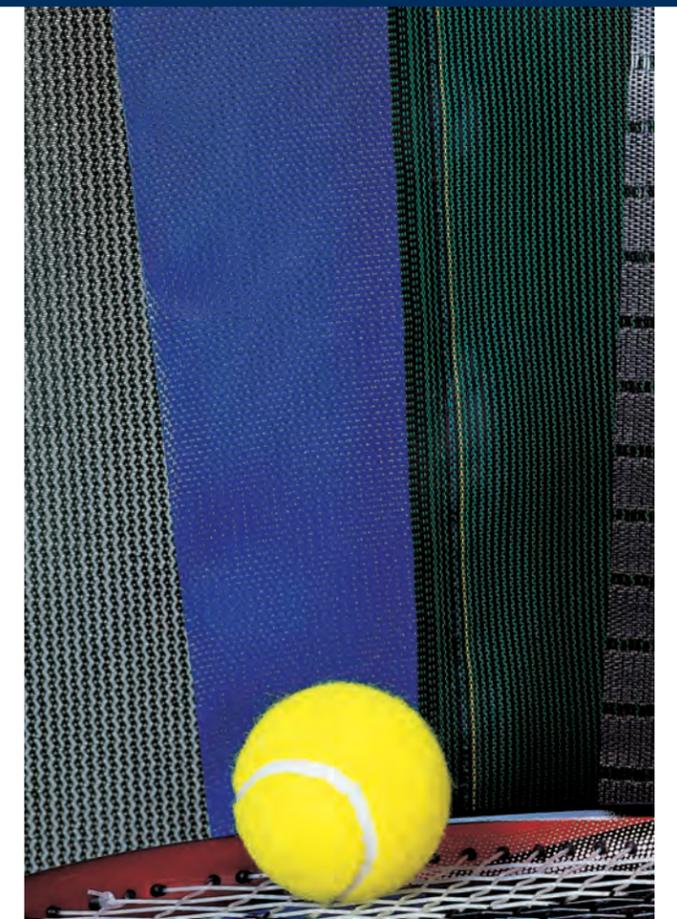

Mats

Our TenCate Permatron® trampoline fabric is the leading trampoline mat fabric in the world. It is the preferred brand of choice for those who rely on the highest level of quality and consistency. The unique weave pattern ensures strength

and durability, and the calendered surface is smooth, offering greater comfort to the trampoline user. Permatron® fabrics is primarily used for “backyard” trampolines, exercise rebounders/joggers, and catamarans. Due to its properties of strength and UV resistance, it is also used as hurricane barrier fabric.

Accessories

Our trampoline line also includes breather fabric for spring pads, lightweight fabric for trampoline covers, and woven and knitted versions of the fabric for trampoline enclosures.

Industrial Fabrics

Truck Cover Fabric

Our super-durable TenCate Nicolon® truck cover fabric is specifically designed for truck covers. Its unique combination of characteristics makes it the preferred cover fabric for flat bed and dump trucks containing garbage, gravel, asphalt, grain, plants, and wood chips. A heat setting process in manufacturing makes it a high strength, durable, and stable fabric for dependable service. A wide range of weights and prices offer plenty of choices, from the basic lightweight cover to the heaviest, most

rugged application. Nicolon® truck cover fabrics are available in 6', 8', 10', and 12' widths, and in woven or knitted styles. Our unique calendered finishing makes this fabric easy to work with to benefit you and your customer.

Sandblast and Containment Fabric

This white, flame retardant, polypropylene fabric is used for sandblasting curtains and containment enclosures.

Specialty Fabrics

Military Fabrics

Our polypropylene screening fabric, conforming to Federal Specification LS125-B, is used for government contracted military tents. This specialty fabric, olive drab in color, can also be used in other applications that require a flame retardant screening. We also developed a special flame retardant fabric for shading and visibility barrier during "Operation Desert Storm."

Filtration Fabrics

Our broad experience and flexible manufacturing capability enables us to meet a variety electrostatic air filtration applications. From design to delivery, our goal is to consistently meet the critical requirements of the filtration industry to insure product integrity.

TenCate develops and produces materials that function to increase performance, reduce cost and deliver measurable results by working with our customers to provide advanced solutions.
